Brower Timing Systems SpeedTrap 1 Instructions

Read Carefully

- 1. Extend wire to desired distance (50 yard maximum) and place Touch Pad the touch pad on the starting line, then aim the IRD-Wire unit across the finish line.
- 2. Have the athlete touch the pad and release (when ready to run).
- 3. The athlete must pass through the finish line within 1 to 7 feet of the IRD-Wire unit. If indoors pass within 1 to 12 feet.
- 4. Read the bottom line of the stopwatch for the athletes' time. No one needs to reset the stopwatch, it works <u>Hands Free</u>.

OTHER INSTRUCTIONS:

- 1. Upon power-up, a series of low tone beeps will sound if the battery in the IRD-Wire unit is low. Battery life is approximately 40 hours.
- 2. If ever the Accusplit Stopwatch "freezes up", press and hold both right and left button for three seconds, this will restart the stopwatch.

Changing Batteries:

To change the battery in the IRD-Wire, remove the set screw, and push against the lens panel to slide the circuit board out of the back of the outer housing. you will see the battery. Replace the battery and slide the circuit board back into the housing. <u>Use only an Energizer 9 volt</u> battery.

Batteries inside the 740MX Stopwatch will last several years and will need to be replaced when the LCD digits become dim.
